

The table below presents the 7 general areas identified as potentially being impacted by noise from port-related activity. Column 1 and 2 present the assigned site numbers and area description as used throughout the report. Column 3 presents an approximate number of units in each area. Column 4 presents the approximate number of units in each area that have direct noise exposure from port-related activity, i.e., not shielded by other buildings. The last column presents the number of units that are impacted or likely impacted. Those units that are likely impacted need verification through outdoor-to-indoor noise measurements for confirmation. Those units that are impacted were confirmed through outdoor-to-indoor measurements. The number of properties match the number of likely impacted and impacted properties mentioned in the presentation to the Board on Friday June 15.

Site No.	Area Description	Approximate Number of Units in the Area	Approximate Number of Units with Direct Exposure	Number of Impacted/Likely Impacted Units
1	Gatun Street Area	133	10	0/0
2	Gaffey Place Area	71	17	0/6
3	MacArthur Avenue Area	45	18	0/9
4	LAUSD – Harbor Occupational Center	1	1	0/0
5	Knoll Hill Area	1	1	0/0
6	Samoan Sea Apartments	148	76	76/0
7	Palos Verde Street Area	37	15	0/3
	Total	435	137	76/18
